

RAMSHATH M M

Kerala, India

+91 9744498761 | ramshath2021@outlook.com | linkedin.com/in/ramshath

Professional Summary

Information Security Analyst with hands-on experience in Web, API, Mobile, and Network Penetration Testing across enterprise environments. Actively involved in vulnerability research, CVE publication, and bug bounty programs. Experienced in manual testing, exploit validation, remediation verification, and leading VAPT engagements for multiple clients.

Achievements

- Acknowledged by 20+ organizations including Apple, Nokia, Lenovo, LG, Philips, and others.
- Published 3 CVEs including CVE-2023-47380, CVE-2023-47379, and CVE-2023-49337.

Certifications

- CEH (Certified Ethical Hacker) – EC-Council
- eWPTX (Web Application Penetration Tester eXtreme) – INE
- eJPT (Junior Penetration Tester) – INE
- Certified AppSec Practitioner (CAP) – The SecOps Group
- Certified Cloud Security Practitioner – AWS (CCSP-AWS)
- Certified Social Engineering Defense Practitioner (CSEDP)
- Microsoft Certified Solution Expert (MCSE)

Skills

- Web, mobile, and network penetration testing using industry-standard tools
- Web application and API security testing using Burp Suite and Postman
- Mobile application analysis using Frida, Objection, Jadx-GUI, and MobSF
- Network vulnerability assessments using Nessus and Nmap
- Firewall configuration reviews using ManageEngine

Academic History

Bachelor of Commerce

2016 – 2019

Experience

Information Security Analyst I

Nov 2023 – Present

Astra Securities, Remote, India

- Led and mentored junior security analysts during VAPT engagements, allocating tasks, reviewing findings, and ensuring high-quality deliverables.
- Conducted penetration testing engagements for multiple client environments, including web applications, mobile browsers, Android, and iOS platforms across 100+ client security engagements.
- Identified and validated critical security vulnerabilities across diverse client applications and infrastructure.

- Performed internal and external network vulnerability assessments for client servers and environments.
- Performed firewall configuration and rulebase reviews using ManageEngine Firewall Analyzer/Firewall Manager to identify misconfigurations and policy gaps.
- Collaborated closely with client stakeholders, development teams, and network teams to support vulnerability remediation and risk reduction.
- Provided secure coding recommendations and VAPT guidance to help clients adopt security best practices.
- Prepared detailed security assessment reports, tracked remediation progress, and performed re-testing to ensure effective vulnerability closure.

Associate Cyber Security Consultant

Oct 2022 – Oct 2023

TNP Consultancy, Kochi, India

- Conducted VAPT assessments on web applications and internal networks, improving client security posture.
- Collaborated with cross-functional teams to enhance security controls and protocols.
- Delivered comprehensive security reports with clear, actionable remediation guidance.

System Support Engineer

Aug 2019 – Apr 2022

Penta Systems, Kannur, India

- Supported network and system troubleshooting with emphasis on endpoint security.
- Improved system efficiency through effective user support and peripheral management.

Security Research & Continuous Learning

- Active bug bounty hunter with earnings in lakhs and multiple recognitions.
- Solved 50+ machines on Hack The Box and Try Hack Me covering Linux, Windows, and Active Directory.
- Completed 50% of PortSwigger Academy labs focusing on web application attacks.
